

VERNACULAR VIDEO MISSION INTERNATIONAL VVMi & ILMAV PARTNERSHIP PROJECT

IMAC REPLACEMENT COMPUTERS

PROJECT NO. 2015-ILMAV-008

NEW PRODUCTION COMPUTERS NEEDED TO CONTINUE WORK

Impactando Las Lenguas Minoritarias Con Audiovisuales (ILMAV), or *Impacting Minority Languages with Audiovisuals*, is headquartered in Lima, Peru, South America. ILMAV began in 2009. It serves as an “umbrella” organization, providing assistance to several small, indigenous Christian media organizations in South America that are working to reach ethnic minority language groups using heart language tools. ILMAV is currently assisting such indigenous organizations not only in Peru but also in Paraguay, Ecuador, and Colombia, with the vision and desire to go anywhere else God would lead them.

Typical ILMAV ministry that utilizes computers includes:

- Dubbing as the Book of Genesis, Luke, Acts, and the JESUS Film;
- Dubbing of the Deditos videos; and
- Assisting local ministry partners with training and consulting;
- Audio recordings of the NT in dramatized form.

This project is necessary due to ILMAV’s only having a 5-year old Windows XP PC and another PC for production work. Much of their other equipment is 6 years. Due to changing software programs and the high demand for HD videos and cameras, ILMAV’s computers do not function on the level needed for making modern-day productions. In fact, their laptops must be reformatted whenever another project is started. The older laptops are functionally obsolete, very inefficient, and are a roadblock to effective ministry.

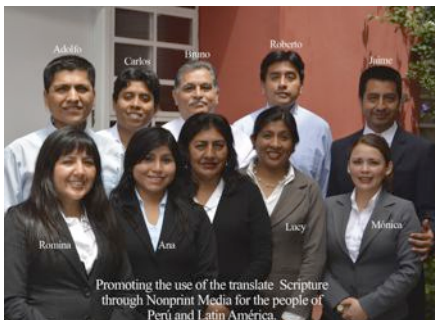

This project will provide funding for the in country purchase of two (2) new Apple iMac computers. These tools are needed for the continuation and expansion of ILMAV’s ministry. The proposed computers will have as much memory, computing power, and production stability as is currently available, which should allow ILMAV to get in sync with the cameras, software, and other tools involved in producing quality media.
